

FOR IMMEDIATE RELEASE

**ADA-ES AWARDED CONTRACT FOR A MERCURY CONTROL SYSTEM
FOR A NEW POWER PLANT IN ARKANSAS**

Littleton, CO – June 26, 2006 – ADA-ES, Inc. (NASDAQ: ADES) today announced that it has been awarded a contract, along with ALSTOM Power, Inc., to supply a mercury emission control system for a new power plant being built in Arkansas. LS Power is building a new plant that will produce 680 gross megawatts of power and burn sub-bituminous coal from the Powder River Basin area of Wyoming. The mercury emission control system will utilize powdered activated carbon to remove mercury from the flue gas of the power plant. ADA-ES anticipates delivery of the system during the fourth quarter of 2007.

“The mercury control marketplace continues to develop at a rapid pace, as evidenced by the contracts we have been awarded covering seven units so far in 2006,” said Dr. Michael Durham, President of ADA-ES. “We expect additional contracts to be granted later this year based upon the large number of proposal requests for this technology to help utilities meet the new mercury emissions regulations being promulgated by various individual states as well as the federal government.”

About ADA-ES

Headquartered in Littleton, Colorado, ADA-ES, Inc. develops and implements proprietary environmental technology and specialty chemicals that mitigate the environmental impacts from electric power and industrial companies, while reducing their operating costs.

This press release may contain forward-looking statements within the meaning of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934, which provide a "safe harbor" for such statements in certain circumstances. Such statements involve significant uncertainties. Actual events or results could differ materially from those discussed in the forward-looking statements as a result of various factors discussed in the Company's filings with the U.S. Securities and Exchange Commission.
