

FOR IMMEDIATE RELEASE

**ADA-ES TESTIFIES AT THE HOUSE WAYS AND MEANS COMMITTEE HEARING
ON ENERGY AND TAX POLICY**

LITTLETON, CO – April 20, 2007 – ADA-ES, Inc. (NASDAQ:ADES) today announced that its President, Dr. Michael Durham, and Director of Clean Coal Technology, Dr. Nina French, presented testimony at the House Ways and Means Committee Hearing on Energy and Tax Policy yesterday, April 19.

The focus of the hearing was the utility of tax incentives in encouraging the further development, expanded production, and increased utilization of clean and renewable energy. Following previous testimony on how the U.S. can help reduce the growing risks stemming from climate change by encouraging the development and use of alternative sources of energy, this hearing took a deeper look into the current framework of tax incentives, seeking ways to update and improve future policies to develop and expand innovative technologies.

ADA-ES' testimony centered on the importance of ensuring that coal continues to be a vital part of the Nation's energy mix. ADA-ES' testimony discussed the importance of using R&D funding and tax incentives as a catalyst to stimulate the development of cost effective technology to control emissions from coal-fired power plants.

ADA-ES' oral and written testimony was based on its experience in developing the mercury control market and Refined Coal technology with support from government R&D and tax credits, which stimulated the development of innovative solutions to emission control at coal-fired power plants.

The complete written testimony submitted by ADA-ES is available on the Company's web site at www.adaes.com.

About ADA-ES

Headquartered in Littleton, CO, ADA-ES is a leader in clean coal technology and the associated specialty chemicals. The Company develops and implements proprietary environmental technology and specialty chemicals that enable coal-fueled power plants to enhance existing air pollution control equipment, maximize capacity and improve operating efficiencies. Through its largest and fastest-growing segment, Mercury Emission Control, ADA-ES supplies activated carbon injection systems, mercury measurement instrumentation, and related services. Additionally, the Company is implementing plans to produce and supply activated carbon.
